SCHOOL ZONE SYSTEMS

TIMERS | CROSSTALK | CROSSLINK

The CrossTalk Smart Lighting Controller easily adapts to any system. On-board cellular technology provides a secure cloud server connection offering real-time access to one or one hundred signs with any cellular device. The CrossLink is a small, compact USB-connected antennae that allows access to the CrossTalk Controller within a close proximity without cellular service.

IR BOLLARDS
FOR TOUCH-LESS ACTIVATION

AVIATION SYSTEMS

MONITORING & LOGGING

Our Aviation LED Beacon Series provides monitoring efficiency and status reporting of aviation lighting anytime, anywhere. The CrossTalk's password protected, cloud-based software provides status logs on a single beacon or multiple beacons. If a failure occurs, the CrossTalk immediately sends a notification to the technician for minimal outage time.

NAVIGATIONAL LIGHTING SYSTEMS WITH SOLAR BACKUP BEACON

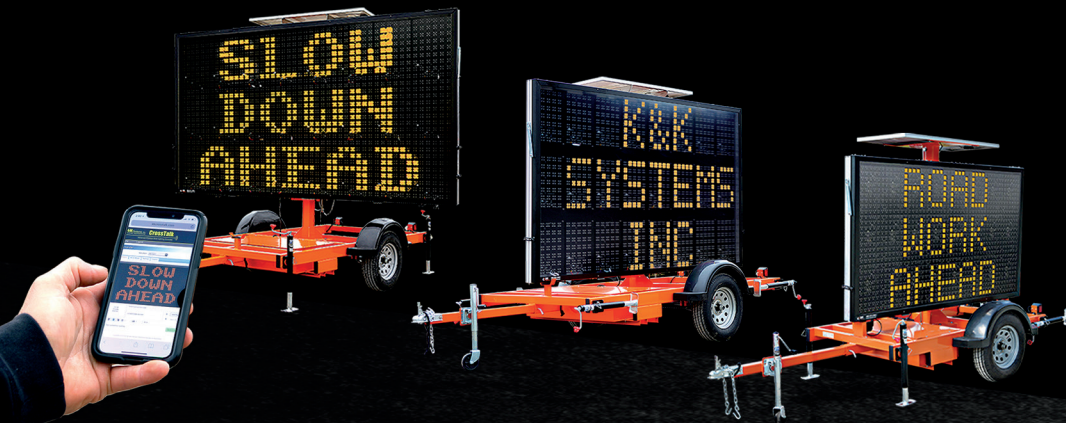

COMPLETE | RETROFIT | BACK-UP ONLY

The solar powered Navigational Backup System compliments AC or DC powered systems by monitoring and activating the LED backup beacon if the primary beacon fails. The system's CrossTalk Controller will send an alert to the managing technician. The Backup Beacon will continue to work until the primary navigation system is repaired.

VEHICLE MOUNT MESSAGE BOARDS

RADAR SPEED MONITOR

TRAILER | POLE | DOLLY

Our radar display line consists of three basic configurations; the Solar Radar Trailers, Driver Feedback Signs (also known as pole mounted radar displays or speed display), and dolly mounted radar display. All of our speed sign and radar displays can be either AC, solar with batteries, or battery powered. All K&K Systems' radars feature auto intensity control, Lexan shielding with aluminum black face to protect display and enhance LEDs, two standard violator alerts; overspeed flashing and overspeed blanking, can be either MPH or KPH, LED technology with 100,000 hour, and K-Band radar.
